- Ability to work on a team and drive goals
- Excellent written and verbal communication skills
- Excellent analytical, decision-making, and project management skills

About the job

Google Cloud teams work with schools, companies, and government agencies to make them more productive, mobile and collaborative. You will oversee all aspects of the Google Cloud sales process, improving it with your insightful data analysis, troubleshooting, and seamless cross-functional teamwork. Your strategies ensure that companies new to Google products get the highest quality customer support and that the Google Cloud program overall is kept on the cutting edge.

As the Global Import Classification Manager, you will serve as a subject matter expert, provide oversight of daily operations, serve as the people manager of the classification team and as the vendor manager for all applicable service providers.

You will guide the team by providing operational import compliance management, partnering with business stakeholders and the Trade Compliance Legal team to make sure that the team meets corporate and regulatory compliance requirements. You will work with both partners to define and measure operational processes and use data to improve compliance controls.

Behind everything our users see online is the architecture built by the Technical Infrastructure team to keep it running. From developing and maintaining our data centers to building the next generation of Google platforms, we make Google's product portfolio possible. We're proud to be our engineers' engineers and love voiding warranties by taking things apart so we can rebuild them. We keep our networks up and running, ensuring our users have the best and fastest experience possible.

Responsibilities

- Serve as an import classification subject matter expert capable of providing classifications globally.

- Serve as a people manager of a global team of classifiers and as a vendor manager for applicable service providers.

- Develop and implement a vision for global import classification operations.

- Exercise oversight of daily global classification operations. Partner with internal stakeholders, regional leaders, and global customs brokers.

- Build and maintain relationships with stakeholders and suppliers to obtain requisite product information to perform accurate import classifications and operational improvements.
